

Detecting Flaws in Reasoning

Learn to detect flaws in arguments and intelligence analysis using the Reasoning Stress Test

Whether in high-stakes matters of national security or in business strategies and presentations, flaws in reasoning can severely undermine an argument.

This Melbourne MicroCert introduces the Reasoning Stress Test (RST) – a method of argument evaluation co-developed with an agency in the National Intelligence Community – to identify and fix key reasoning errors.

It's ideal for intelligence analysts, as well as other analysts and knowledge workers, seeking to master this crucial part of argument evaluation.

Study mode:

Online

Duration:

4 weeks (42.5 hours)

Start:

08 November 2021

Skills area:

Technology

Costs:

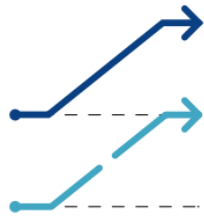

\$1490 AUD (inc GST)
